

PRIOR AUTHORIZATION CHECKLIST

The checklist below is a useful resource for ensuring the most common clinical criteria are met when submitting a prior authorization for your patient.

- Diagnosis of Primary Periodic Paralysis (PPP)
Type of PPP:
 - Hyperkalemic
 - Hypokalemic
 - Paramyotonia Congenita
 - Related Variant: _____ICD-10 Codes: **G72.3** (Periodic Paralysis) or **G71.19** (Other specified myotonic disorders)
- Documentation of PPP attacks:
 - o Frequency
 - o Severity
 - o Duration
- Documentation of relevant clinical assessment(s), family history of PPP, or other relevant labs
- Documentation of all medications that the patient has been on to treat their diagnosis including response or reason for discontinuation. (Some plans may require step therapy)
- Confirmation that the patient does not have:
 - o Hepatic insufficiency
 - o Severe pulmonary obstruction
 - o A hypersensitivity or allergy to sulfonamides
 - o Concurrent use of high-dose aspirin
- Documentation that lifestyle modifications have been reviewed and implemented by the patient to alleviate potential triggers (i.e. dietary restrictions, exercise restrictions)
- Documentation of any PPP-related hospitalizations

Xeris CareConnection™ is available to:

Perform benefits verification and provide information on co-pay and financial assistance programs

Research specific prior authorization requirements for each plan and provide guidance on this process

Call **1-844-538-3947** • Monday through Friday from 8 AM to 7 PM ET

COMMITTED TO SUPPORTING YOUR PATIENTS

Support services
